

The Powerheart® G5 AED Trainer

Realistic, hands-on rescue experience is the best way to prepare. The Powerheart G5 AED Trainer is designed to closely mimic the Powerheart G5 AED for effective, hands-on training. The Trainer simulates different heart arrhythmias and gives students the opportunity to apply defibrillation pads, practice AED use, and perform CPR compressions on a manikin. The clear, instructive voice and metronome guide the user through the rescue scenario. Reusable training pads enable instructors to provide training for adult and pediatric rescues. (Trainer does not provide defibrillation therapy and is for training purposes only.)

With the Powerheart G5 AED Trainer, the instructor can:

- Select among three pre-programmed rescue scenarios.
- Simulate shockable and non-shockable rescue situations.
- Use the CPR Device to assess performance to 2015 Resuscitation Guidelines.
- Train users to perform CPR compressions using a metronome.
- Use a wireless remote control to vary the rescue conditions while students respond.
- Pause the Trainer in mid-scenario to emphasize an important point, and then continue at the same point in the simulation.
- Demonstrate automatic and semi-automatic AED operation.

Powerheart G5 AED Trainer

The G5 AED Trainer is powered by three C batteries (training device) and two AAA batteries (wireless remote control).

Each AED Trainer package includes: (1) AED Trainer, (1) set of Adult Training Pads with CPR Device, (1) Wireless Remote, and (1) Language CD with User Manuals.

Trainer Dimensions (H x W x D): 32 cm x 24 cm x 8 cm (12.5 in x 9.5 in x 3 in)

Powerheart G5 AED Trainer	XTRAED000A
Reusable Training Pads with CPR Device (Adult)	XTRPAD002A
Reusable Training Pads (Adult)	XTRPAD001A
Reusable Training Pads (Pediatric)	XTRPAD003A
Remote Control for Powerheart G5 AED Trainer	XTRRMT001A

Cardiac Science is a global leader in automated external defibrillators (AEDs) and diagnostic cardiac monitoring devices. With the Powerheart G5, we've taken AED technology and design to a new level of reliability, ease of use, and effectiveness. No other AED offers the Powerheart G5's combination of advanced features that include Rescue Ready self-testing, variable escalating energy, fast shock times, and real-time CPR feedback.
